

ALEMTEK

HANGING SYSTEMS

Signs Hanging Systems

ALEMTEK, located in Sweden, has for over 20 years served our partners within lighting, acoustics, signage, and interior design.

ALEMTEK's hanging systems are engineered and designed in Sweden with a timeless touch and quality made to last. With our mind on the global environment, material of choice is considered out of a life cycle perspective to reduce our carbon footprint in every stage.

The examples shown in this manual are meant to give suggestions and inspiration for your product development. Please note that these are only some parts of our full product range; please contact us for more information and to customize products.

Our service is at your disposal.

Best regards,

ALEMTEK

Attachments

Use ALEMTEK attachments to fix the wire to ceilings, walls or floors.

Depending on your installation we have several options for you to choose from.

Use screws and plugs that are optimized for your specific applications.

Wires

ALEMTEK wires provide a safe, discrete and elegant way to suspend a product.

Our wires are available in various materials, platings, diameters and lengths.

Use a wire diameter that endures the weight of your suspended product.

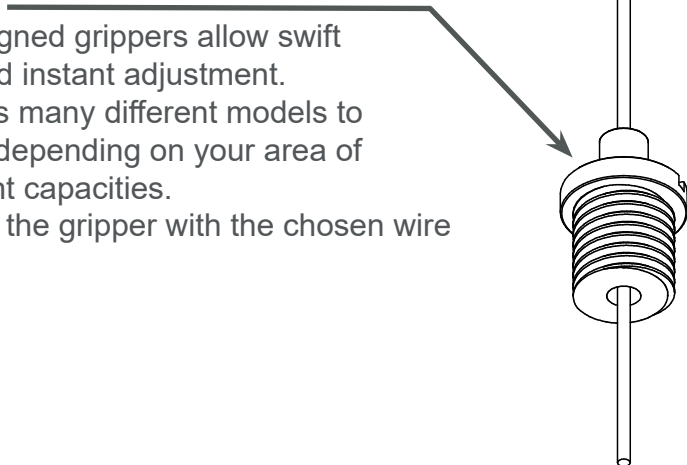

Grippers

Compact designed grippers allow swift installation and instant adjustment.

ALEMTEK has many different models to choose from, depending on your area of use and weight capacities.

Always match the gripper with the chosen wire diameter.

How to use grippers

- A. Insert the wire into the gripper. Always insert the wire through the pin unless otherwise stated.

- B. Adjust the gripper up. When you let go of the gripper it will automatically lock itself on the wire.

- C. Press the pin and adjust down. When you press the pin the lock opens and the gripper slides freely up and down the wire. Release the pin to lock the gripper again.

Attachment

Choose attachment based on the type of ceiling and desired style.

Wire

Choose wire based on the suspended product's weight and wire endings based on gripper and attachment.

Gripper

Choose gripper based on how you want to suspend your product.

Accessories

Some products have extra accessories depending on how the product is going to be used.

To choose the correct parts, you need to know the following:

- What is the loading of the suspended product?
- What kind of ceiling should the attachment be fixed?
- Will it be suspended from a straight horizontal position?
